

# THE BRAIN

1955

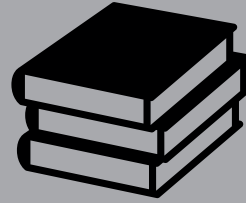

1978: Reporter  
Stephen Levy started  
looking for the brain

Cut into  
240 pieces

Einstein's  
brain has  
been missing  
for 23 years

1985:  
first study  
of Einstein's  
brain...

Found that  
Einstein's brain  
has more glial  
cells for every  
neuron than  
the control  
group brains.

1999:  
Photographs of  
Einstein's brain  
appear in a  
medical journal  
called  
the Lancet
